

Writer User Guide

How to create, write, submit, track, revise, and monitor payments for writer articles.

Who this guide is for

Use this guide if you write articles in the Real Write writer portal.

The screenshots use the writer account shown in the system, but the workflow is the same for each writer login.

Area	Use it for
Dashboard	Create new articles and track article status.
Editor	Write the article, add SEO tags, save drafts, and submit final work.
Earnings	View paid amount, pending amount, approved article count, and payment history.
Notifications	Check system messages and review updates when available.
Profile	Review account details.

1. Writer Portal Overview

After logging in as a writer, the left sidebar gives access to Dashboard, Earnings, Notifications, and Profile. The active section is highlighted. The role label at the bottom confirms that the current login is a writer account, and Logout ends the session.

Screenshot: Writer Dashboard with sidebar navigation, article status counters, and the My Articles table.

What to Check First

- Use the Approved, Rejected, and Rework counters to understand the current state of your articles.
- Use My Articles to see each article title, project, status, AI score, plagiarism score, updated time, and action button.
- Use New article when you need to start a new writing task.
- Use View to open articles that are submitted or approved. Use Edit when an article is in rework.

2. Create a New Article

From the Writer Dashboard, click New article. The New Article page asks for the project, type, title, and short description.

Create Article Fields

Field	What to enter
Project	Select the project assigned for this article, such as New writing Project.
Type	Choose the article type, such as news, based on the assignment.
Title	Enter the article headline or working title.
Short description	Enter a 1-3 line summary of what the article will cover.

1. Select the correct Project.
2. Select the correct Type.
3. Enter a clear Title.
4. Write a short description that summarizes the article.
5. Click Create. The system opens the editor after article creation.

After creation you'll land in the editor (Quill) to write and submit.

Screenshot: New Article page with a project, type, title, and short description filled in.

3. Write in the Editor

The Editor page is where the article is completed. It includes the article title, SEO tags, short description, and long description editor.

Editor

ARTICLE

Title Automotive Industry 2026 Trends SEO tags (comma separated) tag1, tag2

Short description This article explores everything related to 2026 automotive trends

Long description Write your article here...

Back

Screenshot: Editor page with title, SEO tags, short description, and the long description writing area.

Editor Fields

Editor area	How writers should use it
Title	Review or update the article title before submission.
SEO tags	Enter relevant keywords separated by commas, for example tag1, tag2.
Short description	Keep this as a short summary of the article topic.
Long description	Write the full article here using the toolbar for headings, lists, formatting, links, and images where needed.
Word counter	Use the word count near the editor to confirm that the article is long enough before submission.

Writing quality checklist before submission

Make sure the title, short description, and full article all match the assigned topic.

Add SEO tags that match the article topic instead of generic tags.

Use headings, short paragraphs, and lists to make the article easy to read.

Check grammar, factual accuracy, duplicate text, and missing sections before submitting.

Avoid submitting very short articles. The dashboard can show too_short under AI or Plagiarism when there is not enough text to evaluate.

4. Save Draft or Submit

At the bottom of the editor, the system shows the current article state, the Save draft button, and the Submit button.

Screenshot: Bottom editor controls showing draft, Save draft, Submit, and word count.

Button or label	Meaning
draft	The article is currently not submitted and can still be edited.

Save draft	Saves your work without sending it for review. Use this when the article is incomplete.
Submit	Sends the article for review. Use this only after the full article is ready.

5. Track Submitted and Approved Articles

After submitting, return to the Dashboard. The article appears in My Articles with status submitted. The table also shows AI and plagiarism scores when available.

Screenshot: Dashboard after submission, showing submitted status and AI/plagiarism indicators.

When the article is approved, the Approved counter increases and the article status changes to approved. Approved articles appear with a View button.

Screenshot: Dashboard after one article is approved.

Status and Score Reference

Label	What it means	What the writer should do
draft	The article is saved but not submitted.	Continue editing or submit when ready.
submitted	The article has been sent for review.	Wait for review. Use View to inspect the submitted article.
approved	The article passed review.	No further writing action is needed unless instructed.
rework	The article needs changes.	Open it with Edit, review remarks if shown, make changes, and submit again.
rejected	The article was not accepted.	Open View and check the remark column or review feedback.
AI score	System AI-content indicator when the article is long enough to analyze.	Keep writing original, human-edited content.
Plagiarism score	Duplicate-content indicator when the article is long enough to analyze.	Rewrite copied sections and cite/source facts appropriately.
too_short	The article may not have enough words for a reliable check.	Add complete article content before relying on the score.

6. Handle Rework

If an article is returned for rework, the Dashboard Rework counter increases. In My Articles, the article status becomes rework and the action button changes to Edit.

TITLE	PROJECT	STATUS	AI	PLAGIARISM	UPDATED	REMARK
Why the Hyundai Palisade Hybrid Makes Sense for American Families: A Long-Term Review	New writing Project	rework	47%	0%	03/06/2026, 13:17:11	Edit
Automotive industry 2026 Trends	New writing Project	approved	too_short	too_short	03/06/2026, 13:16:19	View

Screenshot: My Articles table with a rework article and an Edit action.

Rework Steps

6. Open the Dashboard.
7. Find the article marked rework.
8. Click Edit.
9. Read any remark or feedback available for the article.
10. Update the title, SEO tags, short description, or article body as required.
11. Click Save draft if you are not done, or Submit when the revised article is ready.

Screenshot: Rework editor controls showing rework status, Save draft, and Submit.

7. Check Earnings and Payments

Open Earnings from the sidebar to review payment totals and payment history. The page shows this month's paid amount, pending amount, and approved article count.

Screenshot: Earnings page with this month's paid amount, pending amount, approved article count, and payment history.

Earnings item	Meaning
Paid this month	Amount already marked as paid during the month.
Pending this month	Amount created but not yet paid.
Approved articles	Number of approved articles counted for the month.
Payment History	Article-level payment entries with amount, payment status, created date, and paid date.
pending	The payment is not paid yet.
Paid at	Shows the payment date after payment is completed. A dash means no paid date is recorded yet.

8. Practical Rules for Writers

- Create one article per assigned topic so tracking, review, and payment stay clean.
- Save draft regularly while writing so incomplete work is not lost.
- Submit only after the long description contains the complete article.
- Watch the dashboard status instead of creating a duplicate article for the same assignment.
- If an article is rework, edit the existing article and resubmit it from the editor.
- Use Earnings to monitor pending and paid amounts, but contact the admin team for payment questions or missing entries.

Quick Workflow Summary

Step	Action	Expected result
1	Dashboard > New article	New Article form opens.
2	Fill project, type, title, and short description	Article information is ready.
3	Click Create	Editor opens.
4	Write article and SEO tags	Article body is complete.
5	Save draft or Submit	Draft is saved or article enters review.
6	Check Dashboard status	Article shows submitted, approved, rejected, or rework.
7	If rework, click Edit and resubmit	Revised article returns to review.
8	Open Earnings	Payment status and history can be checked.
